MICRODOLLY was out on location with Director of Photography John Mans.

"My **MICRODOLLY JIB** has been with me in Africa, Asia, South America and the U.S. this past year," said Mans. "This picture was on a National Geographic shoot in Saharan Africa near Timbuktu."

"Many times my work involves very distant locations, and the new airline baggage fees have put more pressure than ever to pack light. **MICRODOLLY** is synonymous with light weight and clever design. This type of gear is clearly the future of filmmaking," concluded Mans.
